**Subject:** RE: minutes from Sep 22 interagency PH permits coord meeting

Hi Alex-

Thanks for the opportunity to review. Everything is generally in line with EPA's notes. Please note the following items for your consideration regarding the PGE RM13.1 project:

- EPA expressed an expectation that sediment would be sampled downstream of the pit formed by the water main leak to see if contaminated sediment got transported.
- EPA understands that PGE will draw upon agency comments on the PGE RM13.5 sediment cap project; for example regarding turbidity monitoring.

Please call or email if you have questions. Thanks.

Eva

**Subject:** minutes from Sep 22 interagency PH permits coord meeting

Hi All.

Attached please find the draft minutes from the meeting on Sep 22. Please let me know if there are any significant errors that must be changed, else these will become final. The draft version has been provided to managers for discussion tomorrow about the past 3 months.

Consultants, please forward to others on your team, as you see fit. Thanks for participating.
